## Summary

Information Technology graduate with a focus on frontend development and experience in manual testing, technical support, and basic hardware assembly and disassembly. Skilled in ReactJS, JavaScript, HTML, and CSS, with strong troubleshooting and bug identification abilities. Adaptable and detail-oriented, seeking opportunities in frontend, QA, or technical support roles.

## Projects

**Home Security Sound Detection and Recognition System (Capstone Project)**
IoT and Machine Learning Security System

- Developed a real-time sound detection system designed to identify unusual audio patterns for home security monitoring.
- Integrated machine learning classification models capable of detecting alarms, breaking objects, and suspicious noises.
- Implemented an IoT-based alert system that sends notifications when abnormal sounds are detected.
- Built a monitoring interface for viewing sound detection events and system activity.
- Designed a system architecture connecting audio sensors, processing modules, and alert mechanisms.

**PokeWeb – Pokédex Battle Simulation Web Application**
Interactive Web Application

- Built a Pokédex-inspired web application that allows users to explore Pokémon data and simulate battles.
- Integrated external Pokémon APIs to retrieve real-time Pokémon information including abilities, stats, and types.
- Implemented dynamic search and filtering functionality for efficient Pokémon browsing.
- Developed a battle simulation logic system comparing Pokémon stats to determine outcomes.
- Designed a responsive and interactive UI optimized for both desktop and mobile devices.

**Student Behavior & Performance Grade Calculation System Software**
Engineering Academic Project

- Developed a web-based grading system for calculating behavior and performance-based scores for senior high school students.
- Created a teacher dashboard interface for entering and managing student evaluation data.
- Automated grade computation and report generation to reduce manual errors and improve efficiency.
- Implemented data management features for storing and retrieving student records.

## Education

**Bachelor of Science in Information Technology** **2025**
Western Mindanao State University

## Skills

**Language / Frameworks:** ReactJs, JavaScript, Html5, Css3, TailwindCss, Styled-Components, Vite
**Version Control / Deployment:** Git, GitHub, GitHub Pages, Vercel, Netlify
**Software & Testing Skills:** Manual Testing, Bug Identification and Reporting
**Soft Skills:** Problem Solving, Attention to Detail, Team Collaboration, Adaptability and Fast Learning

## Certifications

- Responsive Web Design — freeCodeCamp
- JavaScript for Beginners — Simplilearn
- ReactJS for Beginners — Simplilearn
- Advanced HTML — LinkedIn Learning
- Tailwind CSS — LinkedIn Learning
